

# Fire engineering

A collection of BRE expert guidance on fire modelling and engineering for the built environment

# Introduction

## Welcome to the BRE Expert Collections.

IHS BRE Press is the exclusive publisher of BRE publications. Publications are produced in various series, which are outlined below. Information on how to purchase BRE publications is given on the next page, together with information about BRE and IHS.

This pdf contains a valuable collection of short BRE publications on fire modelling and engineering for the built environment. It is one of a series of compilations of BRE background documents and current guidance and advice on the built environment, each offering exceptional value for construction professionals.

Adobe Acrobat Reader X or later for Windows or Macintosh is required to run this pdf. The pdf can be searched using the bookmarks panel and the links from the emboldened text on the Contents pages.

---

## BRE publication types

---

**Digests** are authoritative summaries of the state-of-the-art on specific topics in construction design and technology. They draw on BRE expertise and provide essential support for all involved in design, specification, construction and maintenance.

**Information Papers** summarise recent innovation and research findings, and give advice on how to apply this information in practice.

**Good Building Guides** give concise guidance on the principles and practicalities of achieving good-quality building. These highly illustrated practical guides draw on BRE experience and research, and other sources, to provide clear technical advice and solutions.

**Good Repair Guides** are an extensively illustrated series, providing practical information on the identification, diagnosis and repair of defects. Good Repair Guides look at what went wrong, explain why, and give practical advice on how to put it right.

**Books, reports and manuals** present research, innovation, best practice and case studies in more detail.

**BRE Connect Online** is an online subscription to **all** BRE publications. Information about BRE Connect Online is included [HERE](#).

---

## Buying BRE publications

---

Online: [www.brebookshop.com](http://www.brebookshop.com) to order hard copy and pdf publications

Tel: +44 (0) 1344 328038, Email: [brepress@ihs.com](mailto:brepress@ihs.com)

Mail: IHS BRE Press, The Capitol Building, Oldbury, Bracknell RG12 8FZ, UK

---

## About BRE

---

BRE Group (BRE) is a world-leading centre of built environment expertise, research and training, and includes a third-party approvals organisation offering certification of products and services to international markets.

**BRE** is owned by BRE Trust, the largest UK charity dedicated specifically to research and education in the built environment. BRE Trust uses the profits made by BRE to fund new research and education programmes that advance knowledge, innovation and communication for public benefit.

Information about BRE can be found [HERE](#).

---

## About IHS

---

**IHS** (NYSE: IHS) is the leading source of information, insight and analytics in critical areas that shape today's business landscape. Businesses and governments in more than 165 countries around the globe rely on the comprehensive content, expert independent analysis and flexible delivery methods of IHS to make high-impact decisions and develop strategies with speed and confidence. IHS is the exclusive publisher of BRE publications.

IHS Global Ltd is a private limited company registered in England and Wales (no. 00788737).

Registered office: The Capitol Building, Oldbury, Bracknell, Berkshire RG12 8FZ. [www.ihs.com](http://www.ihs.com)

Information about IHS can be found [HERE](#).

# Contents

## Fire simulation

An introduction to the use of fire modelling	<b>IP 12/10</b>
Evacuation modelling and human behaviour in fire	<b>DG 516</b>
Fire modelling with computational fluid dynamics	<b>DG 511</b>

## Materials

Structural fire engineering design – Materials behaviour: Part 1 – Concrete	<b>DG 487-1</b>
Part 2 – Steel	<b>DG 487-2</b>
Part 3 – Masonry	<b>DG 487-3</b>
Part 4 – Timber	<b>DG 487-4</b>
Passive and reactive fire protection to structural steel	<b>IP 6/12</b>
Precast Hollowcore slabs in fire	<b>IP 5/03</b>

## Structures

Structural fire engineering design – Introduction	<b>DG 484</b>
Structural fire engineering design: Part 1 – Aspects of life safety	<b>DG 490</b>
Part 2 – Fire and thermal response	<b>DG 488</b>
Part 3 – Fire development	<b>DG 485</b>
Assessing the fire performance of existing reinforced concrete flooring systems	<b>IP 9/12</b>
External fire performance of roofs	<b>DG 528</b>
Fire performance of light steel-framed buildings	<b>IP 6/11</b>
Fire performance of Structural Insulated Panel systems	<b>IP 21/10</b>
Steel structures supporting composite floor slabs: design for fire	<b>DG 462</b>
